

Overall ECS Status Mike Daily

January 28, 1997

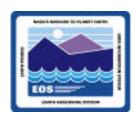

Overall ECS Status

- Release A has been redirected
 - focus ECS energies and staff on Release B
 - field some RelA components as early testbed
- Release B replanned
 - split into B.0 (prelaunch) and B.1 (postlaunch)
 - perform iterative integration (lesson learned from RelA)
 - workarounds identified, including V0 Client in B.0
- Planned 'just-in-time' release
 - provide key pullside functions at launch
 - prioritized list likely to include subsetting, L7, ASTER,...
 - still in discussion with ESDIS and community
